experience and prayer, were greatly enjoyed by the attentive crowd. Rev. A. H. Ames conducted the meeting. Among the new arrivals are G. W. Morse, agent Adams Express Company; C. B. Bailey, of the Washington Gas Company; Rev. W. J. McKluney and Job Price, of Baltimore.

Rev. Hugh Huleatt, chaptain to Her Majesty, at the H. M. Asylum, at Chelsea, stopped here last night. He had never before, in a life of about forty-five years, seen a camp meeting. The very hospitable preciding elder, who always has a malle for every one, welcomed and showed him the camp, and explained the details of its operation and management.

The attendance from the surrounding country is quite inrge to-day. Camp-moeting has a peculiar attraction for country people, and, as it is held at an idle ceasen, few let the opportunity of attending pass unimproved. The number who are daily in attendance here has been increased by the on-coming political campaign. The know, ing once say that this accounts for the frequent presence of Kon. Montgomery Blair, who is propecting. Political taik, on the outskirts of the camp, is quite animated among the men, who linger about while the woman are attending religious services.

TRAVELEMS' TESTIMONY.

Thousands of trävelers by land and see have wouched for the efficacy of Hostetter's Stomach Bitters as a preventive of the physical disturbances which ordinarily arise from change of climate and the changes of diel, water, &c., incident to a wandering life. Upon systems toned, invigorated and regulated by this genial vogetable antidote the external causes of debility and disease seem to produce little or no effect. Forearmed with Hostetter's Bitters, the voyager may bid defiance to sea-rickness and encounter the chilling fogs of the British Isles, the coast winds of the Antilles, the sey temperature of northern Alaska, or the burning heat of the tropics, with equal impunity. The effect of this admirable medicated stimulant is greatly to increase the vital energy of the system, thereby enabling it to resist and repol the actiting causes of disease.
